Experienced R&D Cybersecurity Manager, M/F

wanted for the location in Montigny-le-Bretonneux, Paris area

What you can expect:

As an experienced R&D Cybersecurity Manager, you will lead the transformation related to cybersecurity within R&D in an international context. You will manage all cybersecurity activities for the product portfolio during development, validation and support activities for all R&D centers. You will be the guarantor of the security of the products according to the standards in force. In this context, you will also interact with all the other departments of the company.

You will be responsible for :

- Implementing good design practices according to cybersecurity principles
- Planning all transformation axes
- Coordinating the development and testing of security functions and the delivery of engagements
- Implementing the necessary vulnerability monitoring and patching management processes
- Defining the certification strategy (ANSSI, CC...), products / solutions and carrying it out

What you bring to the table:

You have experience in telecoms and/or the development of real-time solutions and a good knowledge of cybersecurity.

We propose you to join Kontron Transportation France and its center of excellence within the R&D department.

In addition, you have :

- A technical background in the field of information and communication technologies (ICT)
- Skills in cybersecurity functionalities and solutions
- Practical experience in software development / telecommunications solutions
- Experience with the internals of Linux: booting, linking, loading, shared objects...
- Experience in vulnerability monitoring and analysis,
- Experience with malware protection

You are recognised for the following qualities :

- Understanding of the telecommunications industry
- Understanding of operating systems
- Ability to work independently in a team environment
- Ability to influence, motivate and mobilise team members and business partners
- Knowledge of fundamental security concepts, security design principles and processes: cryptography, PKI, RBAC, SIEM, IAM, protection profiles CC....
- Rigorous, organised and a taste for efficient work
- Tenacious in the face of difficulties
- A good listener and comfortable in human relations, while being discreet and trustworthy

What we offer:

Kontron Transportation promotes flexible working hours that support the reconciliation of work and family. Kontron also offers you the opportunity to work independently in an extremely pleasant and modern work environment with flat hierarchies and to actively shape the further development of the company. We also support professional and personal development.

We offer a full time permanent work contract along with an attractive remuneration according to skills, profile and market.

If you wish to join us, please send a CV and a covering letter to KTR_FR_HR_Mailbox@kontron.com
