

La Société du Grand Paris opts for Kontron Transportation technology

Vienna / Montigny, 26 January 2022 - [Kontron Transportation](#) has been awarded a contract by La Société du Grand Paris (SGP) for the supply, installation and maintenance of the private radio system for line 18 of the Grand Paris Express network. The 15-year contract is part of the biggest construction project in Europe to date.

Kontron Transportation's scope of delivery concerns the deployment of the 4G public-safety LTE (PS-LTE) radio systems, the wireless broadband network infrastructure, the onboard devices and the mobile terminals necessary for public transportation operations and safety over 35 kilometers of railway tracks and associated train stations from Orly to Versailles. The 15-year contract is part of the largest ongoing construction project in Europe to date.

Kontron Transportation is arguably recognized by the market as a totally relevant supplier in the Private Mission Critical 4G/5G Network competition, for both infrastructure and applications domains. Its specific positioning with a differentiating end to end solution, focused around mission critical networks, allows professional-mobile-radio (PMR) operators to build a reliable and fit-for-purpose private network, therefore bringing an appropriate response in two main types of challenging situations :

- Urgent replacement of end of life analog systems, terrestrial trunked radio (TETRA) and/or digital mobile radio (DMR) networks with a reliable, standardized and affordable PMR technology (criteria currently not met by the competition).
- Provide a highly secure broadband access for mission critical digital applications. This is not met by mobile network operators and Internet service providers.

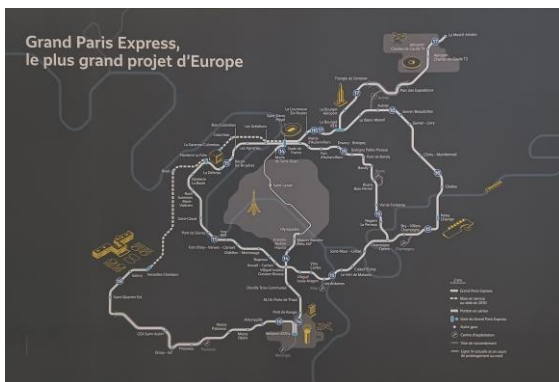

„We would like to thank La Société du Grand Paris for the trust in Kontron Transportation. We are very pleased to offer our innovative and customized communication solutions to SGP and to work for the comfort and security of the Paris metro system”, says Michael Riegert, CEO Kontron Transportation.

„SGP will benefit from the technology competence of Kontron Transportation and the entire S&T group. Our whole team is highly motivated and inspired by this outstanding project“, says Bernd Eder, CFO Kontron Transportation

“The SGP win will create the momentum towards positive CHANGE, while ensuring both knowledge preservation and transfer of expertise”, says Richard Bussienne, VP Sales & Operations WE-MEA & Turkey Kontron Transportation.

About Kontron – Member of the S&T Group

Kontron is a global leader in IoT/Embedded Computing Technology (ECT). As part of the Kontron technology group, Kontron offers individual solutions in the areas of Internet of Things (IoT) and Industry 4.0 through a combined portfolio of hardware, software and services. With its standard and customized products based on highly reliable state-of-the-art technologies, Kontron provides secure and innovative applications for a wide variety of industries. As a result, customers benefit from accelerated time-to-market, lower total cost of ownership, extended product lifecycles and the best fully integrated applications.
