SMARC EVALUATION CARRIER

The SMARC Evaluation carrier board is designed to allow embedded application developers to get up and running quickly on the SMARC modular platform, giving them a head start on the total system design. Simply select the SMARC module best suited for your application needs, install the module and you are ready to get started. The SMARC Evaluation Carrier is compliant with the SMARC specification and supports a broad range of interface options dedicated for low power applications including Gigabit Ethernet support, SIM card socket, Kontron LVDS adapter, USB hub to support different PCI express interface options.

The SMARC Evaluation Carrier supports flexible power options including Li-Ion battery power with recharging circuitry as well as traditional bench top power supplies.

To further enable maximum design flexibility the Kontron Evaluation Carrier board provides industry standard mezzanine connectors supporting MO-300 SATA, mini PCIe x2, PCIe x1 as well as Kontron defined mezzanine interfaces for SI camera interface, eMMC storage and LVDS displays.
