## **CP-RIO6-M**

### **Dual 2.5" SATA Storage 6U CompactPCI Rear Transition Module**

Doc. ID: 1031-2494, Rev. 2.0  
May 11, 2011

## Revision History

Publication Title:		CP-RIO6-M Dual 2.5" SATA Storage 6U CompactPCI Rear Transition Module
Doc. ID:		1031-2494
Rev.	Brief Description of Changes	Date of Issue
1.0	Initial issue	4-Jun-2009
2.0	General update	11-May-2011

## Proprietary Note

This document contains information proprietary to Kontron. It may not be copied or transmitted by any means, disclosed to others, or stored in any retrieval system or media without the prior written consent of Kontron or one of its authorized agents.

The information contained in this document is, to the best of our knowledge, entirely correct. However, Kontron cannot accept liability for any inaccuracies or the consequences thereof, or for any liability arising from the use or application of any circuit, product, or example shown in this document.

Kontron reserves the right to change, modify, or improve this document or the product described herein, as seen fit by Kontron without further notice.

## Trademarks

Kontron, the *PEP* logo and, if occurring in this manual, “CXM” are trademarks owned by Kontron, Kaufbeuren (Germany). In addition, this document may include names, company logos and trademarks, which are registered trademarks and, therefore, proprietary to their respective owners.

## Environmental Protection Statement

This product has been manufactured to satisfy environmental protection requirements where possible. Many of the components used (structural parts, printed circuit boards, connectors, batteries, etc.) are capable of being recycled.

Final disposition of this product after its service life must be accomplished in accordance with applicable country, state, or local laws or regulations.

## Explanation of Symbols

### ***Caution, Electric Shock!***

This symbol and title warn of hazards due to electrical shocks (> 60V) when touching products or parts of them. Failure to observe the precautions indicated and/or prescribed by the law may endanger your life/health and/or result in damage to your material.

Please refer also to the section “High Voltage Safety Instructions” on the following page.

### ***Warning, ESD Sensitive Device!***

This symbol and title inform that electronic boards and their components are sensitive to static electricity. Therefore, care must be taken during all handling operations and inspections of this product, in order to ensure product integrity at all times.

Please read also the section “Special Handling and Unpacking Instructions” on the following page.

### ***Warning!***

This symbol and title emphasize points which, if not fully understood and taken into consideration by the reader, may endanger your health and/or result in damage to your material.

### ***Note ...***

This symbol and title emphasize aspects the reader should read through carefully for his or her own advantage.

## For Your Safety

Your new Kontron product was developed and tested carefully to provide all features necessary to ensure its compliance with electrical safety requirements. It was also designed for a long fault-free life. However, the life expectancy of your product can be drastically reduced by improper treatment during unpacking and installation. Therefore, in the interest of your own safety and of the correct operation of your new Kontron product, you are requested to conform with the following guidelines.

### High Voltage Safety Instructions

#### **Warning!**

All operations on this device must be carried out by sufficiently skilled personnel only.

#### **Caution, Electric Shock!**

Before installing a not hot-swappable Kontron product into a system always ensure that your mains power is switched off. This applies also to the installation of piggybacks.

Serious electrical shock hazards can exist during all installation, repair and maintenance operations with this product. Therefore, always unplug the power cable and any other cables which provide external voltages before performing work.

### Special Handling and Unpacking Instructions

#### **ESD Sensitive Device!**

Electronic boards and their components are sensitive to static electricity. Therefore, care must be taken during all handling operations and inspections of this product, in order to ensure product integrity at all times.

Do not handle this product out of its protective enclosure while it is not used for operational purposes unless it is otherwise protected.

Whenever possible, unpack or pack this product only at EOS/ESD safe work stations. Where a safe work station is not guaranteed, it is important for the user to be electrically discharged before touching the product with his/her hands or tools. This is most easily done by touching a metal part of your system housing.

It is particularly important to observe standard anti-static precautions when changing piggybacks, ROM devices, jumper settings etc. If the product contains batteries for RTC or memory backup, ensure that the board is not placed on conductive surfaces, including anti-static plastics or sponges. They can cause short circuits and damage the batteries or conductive circuits on the board.

---

## General Instructions on Usage

In order to maintain Kontron's product warranty, this product must not be altered or modified in any way. Changes or modifications to the device, which are not explicitly approved by Kontron and described in this manual or received from Kontron's Technical Support as a special handling instruction, will void your warranty.

This device should only be installed in or connected to systems that fulfill all necessary technical and specific environmental requirements. This applies also to the operational temperature range of the specific board version, which must not be exceeded. If batteries are present, their temperature restrictions must be taken into account.

In performing all necessary installation and application operations, please follow only the instructions supplied by the present manual.

Keep all the original packaging material for future storage or warranty shipments. If it is necessary to store or ship the board, please re-pack it as nearly as possible in the manner in which it was delivered.

Special care is necessary when handling or unpacking the product. Please consult the special handling and unpacking instruction on the previous page of this manual.

## Two Year Warranty

Kontron grants the original purchaser of Kontron's products a **TWO YEAR LIMITED HARDWARE WARRANTY** as described in the following. However, no other warranties that may be granted or implied by anyone on behalf of Kontron are valid unless the consumer has the express written consent of Kontron.

Kontron warrants their own products, excluding software, to be free from manufacturing and material defects for a period of 24 consecutive months from the date of purchase. This warranty is not transferable nor extendible to cover any other users or long-term storage of the product. It does not cover products which have been modified, altered or repaired by any other party than Kontron or their authorized agents. Furthermore, any product which has been, or is suspected of being damaged as a result of negligence, improper use, incorrect handling, servicing or maintenance, or which has been damaged as a result of excessive current/voltage or temperature, or which has had its serial number(s), any other markings or parts thereof altered, defaced or removed will also be excluded from this warranty.

If the customer's eligibility for warranty has not been voided, in the event of any claim, he may return the product at the earliest possible convenience to the original place of purchase, together with a copy of the original document of purchase, a full description of the application the product is used on and a description of the defect. Pack the product in such a way as to ensure safe transportation (see our safety instructions).

Kontron provides for repair or replacement of any part, assembly or sub-assembly at their own discretion, or to refund the original cost of purchase, if appropriate. In the event of repair, refunding or replacement of any part, the ownership of the removed or replaced parts reverts to Kontron, and the remaining part of the original guarantee, or any new guarantee to cover the repaired or replaced items, will be transferred to cover the new or repaired items. Any extensions to the original guarantee are considered gestures of goodwill, and will be defined in the "Repair Report" issued by Kontron with the repaired or replaced item.

Kontron will not accept liability for any further claims resulting directly or indirectly from any warranty claim, other than the above specified repair, replacement or refunding. In particular, all claims for damage to any system or process in which the product was employed, or any loss incurred as a result of the product not functioning at any given time, are excluded. The extent of Kontron liability to the customer shall not exceed the original purchase price of the item for which the claim exists.

Kontron issues no warranty or representation, either explicit or implicit, with respect to its products' reliability, fitness, quality, marketability or ability to fulfil any particular application or purpose. As a result, the products are sold "as is," and the responsibility to ensure their suitability for any given task remains that of the purchaser. In no event will Kontron be liable for direct, indirect or consequential damages resulting from the use of our hardware or software products, or documentation, even if Kontron were advised of the possibility of such claims prior to the purchase of the product or during any period since the date of its purchase.

Please remember that no Kontron employee, dealer or agent is authorized to make any modification or addition to the above specified terms, either verbally or in any other form, written or electronically transmitted, without the company's consent.

# Introduction

---

This page has been intentionally left blank.

# 1. Introduction

## 1.1 Board Overview

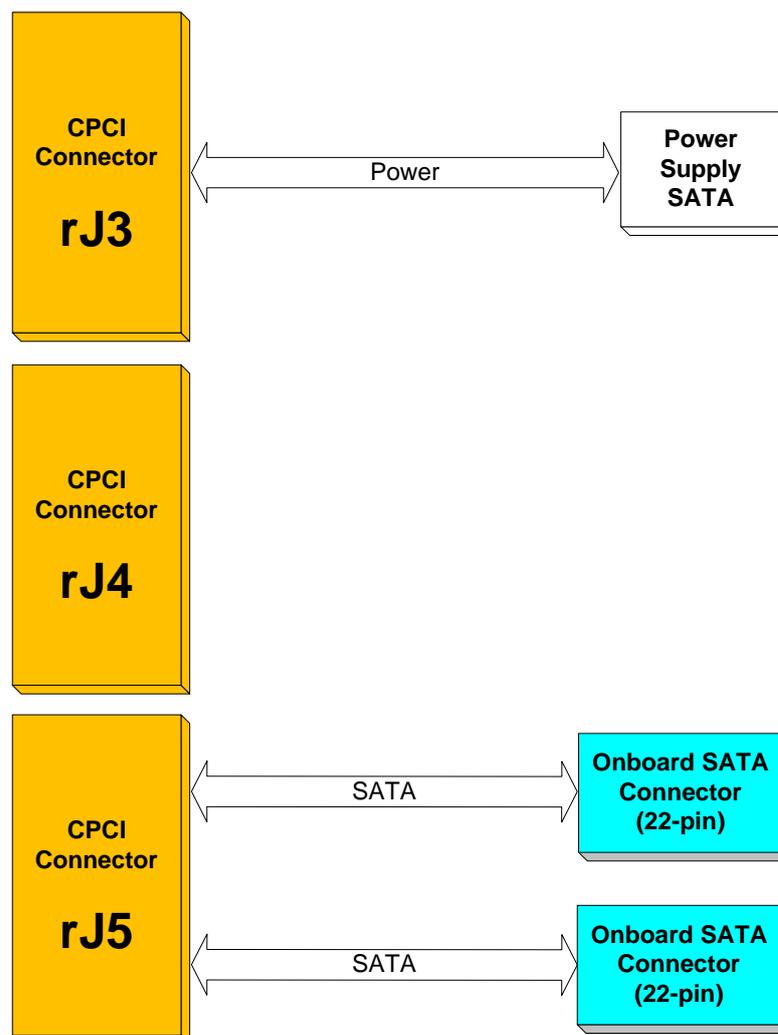

The CP-RIO6-M 6U CompactPCI rear transition module has been designed for use with Kontron 6U CompactPCI CPU boards and provides the capability to install two onboard 2.5" SATA HDDs/SSDs. In order to use the CP-RIO6-M, a special 6U CompactPCI backplane with rear I/O support as well as a compatible and correctly configured CPU board are required. The CP-RIO6-M connects to the backplane via three CompactPCI connectors.

## 1.2 Board Diagrams

The following diagrams provide additional information concerning the boards' functionality and component layout.

### 1.2.1 Functional Block Diagrams

Figure 1-1: CP-RIO6-M Functional Block Diagram

1.2.2 Front Panel

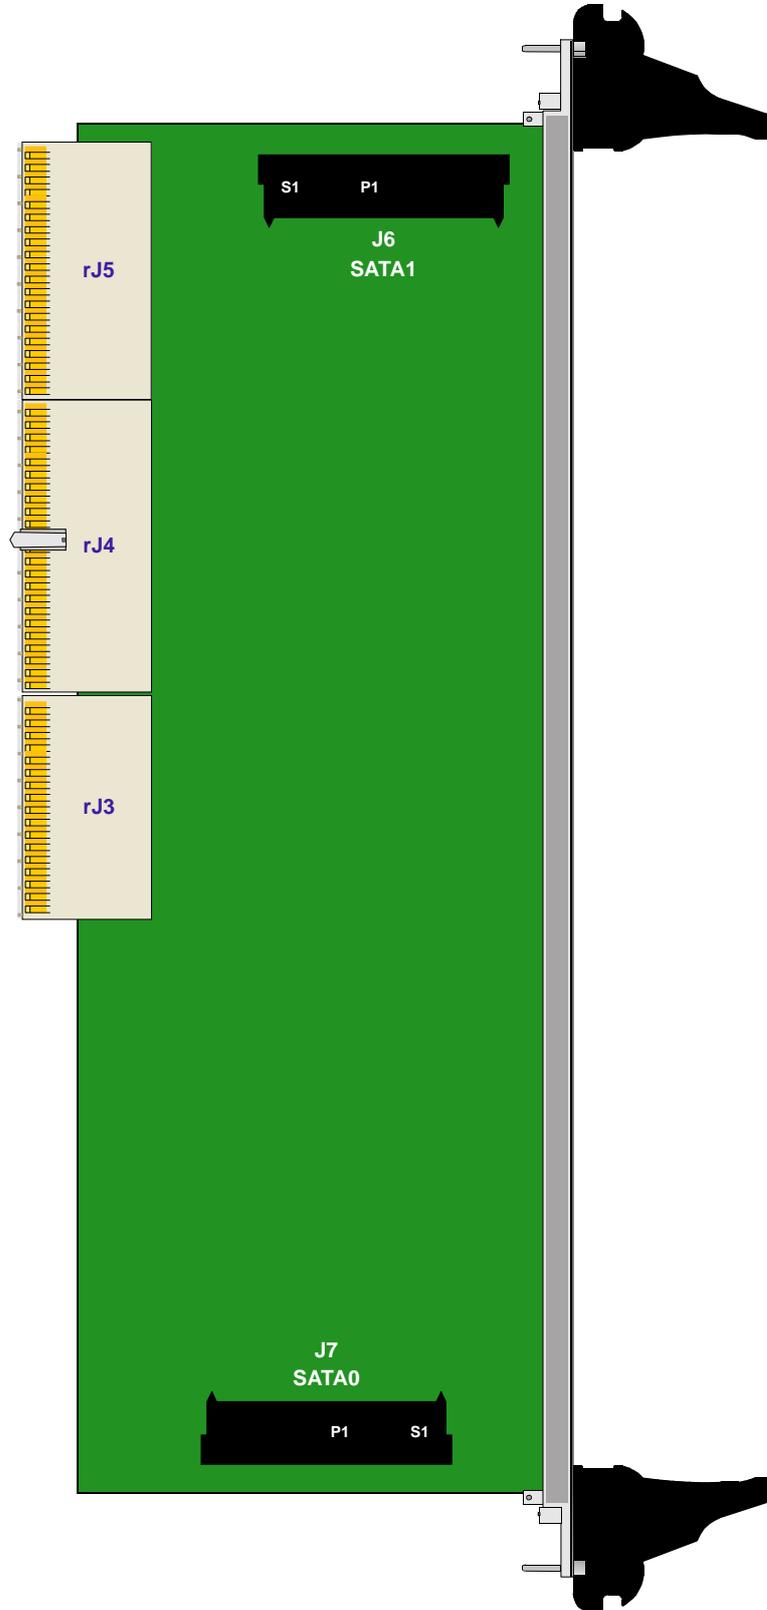

Figure 1-2: CP-RIO6-M Front Panel

1.2.3 Board Layout

Figure 1-3: CP-RIO6-M Board Layout – Front View

## 1.3 Technical Specification

**Table 1-1: CP-RIO6-M Main Specifications**

CP-RIO6-M		SPECIFICATIONS
Onboard Interfaces	SATA	Two SATA I interfaces implemented as onboard, 22-pin, SATA connectors, J6 and J7, for connecting two 2.5" SATA HDDs/SSDs
	CompactPCI	Three CompactPCI connectors, rJ3, rJ4 and rJ5, for connecting the CP-RIO6-M to the backplane
General	Temperature Range	Operational: 0°C to +60°C Standard -40°C to +85°C E2 (without any SATA HDDs/SSDs) Storage: -55°C to +85°C Without any SATA HDDs/SSDs   <p><b>Note ...</b> When SATA HDDs/SSDs are installed, refer to their operational specifications as this will influence the modules' operational and storage temperature.</p>
	MTBF	2286782 h (MIL-HDBK-217 FN2, Ground Benign 30°) 6343931 h (Bellcore Issue 6, Ground Benign 30°)
	Mechanical	6U, 4HP, CompactPCI-compliant form factor
	Dimensions	233.35 mm x 80 mm
	Board Weight	200 g (without 2.5" SATA HDD/SSD)

## 1.4 Standards

The CP-RIO6-M complies with the requirements of the following standards:

**Table 1-2: Standards for the CP-RIO6-M**

TYPE	ASPECT	STANDARD	REMARKS
CE	Emission	EN55022 EN61000-6-3	--
	Immission	EN55024 EN61000-6-2	--
	Electrical Safety	EN60950-1	--
Mechanical	Mechanical Dimensions	IEEE 1101.10	--
Environmental	Climatic Humidity	IEC60068-2-78	93% RH at 40°C, non-condensing
	WEEE	Directive 2002/96/EC	Waste electrical and electronic equipment
	RoHS	Directive 2002/95/EC	Restriction of the use of certain hazardous substances in electrical and electronic equipment
	Vibration (Sinusoidal)	IEC61131-2 IEC60068-2-6	Test parameters for the CP-RIO6-M without any SATA HDD/SSDs (see note below): <ul style="list-style-type: none"> <li>• 5-150 (Hz) frequency range</li> <li>• 1 (g) acceleration</li> <li>• 1 (oct/min) sweep rate</li> <li>• 10 cycles/axis</li> <li>• 3 axes</li> </ul>
	Single Shock	IEC61131-2 IEC60068-2-27	Test parameters for the CP-RIO6-M without any SATA HDD/SSDs (see note below): <ul style="list-style-type: none"> <li>• 15 (g) acceleration</li> <li>• 11 (ms) pulse duration</li> <li>• 3 shocks per direction</li> <li>• 6 directions</li> <li>• 5 (s) recovery time</li> </ul>

### Note ...

For information relating to shock and vibration standards for the HDD/SSD devices, refer to the respective manufacturer's specification.

### Note ...

Kontron performs comprehensive environmental testing of its products in accordance with applicable standards.

Customers desiring to perform further environmental testing of Kontron products must contact Kontron for assistance prior to performing any such testing. This is necessary, as it is possible that environmental testing can be destructive when not performed in accordance with the applicable specifications.

In particular, for example, boards **without conformal coating** must not be exposed to a change of temperature exceeding 1K/minute, averaged over a period of not more than five minutes. Otherwise, condensation may cause irreversible damage, especially when the board is powered up again.

Kontron does not accept any responsibility for damage to products resulting from destructive environmental testing.
