3U CompactPCI® Intel® Celeron® VALUE LINE CPU

- cost-optimized board design
- industry tailored
- comprehensive I/O capabilities
CP3003-V
3U CompactPCI® Intel® Celeron® VALUE LINE CPU

Optimized for reduced costs delivering maximum value, the CP3003-V combines the capabilities of an all-in-one industrial PC with the advantages of a robust 3U CompactPCI® design. The board offers customers an all-round package of up-to-date communication interfaces combined with solid graphics and processing performance all at a competitive price level. This combination makes the CP3003-V a perfect fit for industrial automation applications such as visualization, machine control or inspection where the price is often the crucial criterion.

Optimized Price-Performance Ratio
The CP3003-V features the Intel® Celeron® 807UE processor (2nd Generation Core™ technology) combined with the Mobile Intel® QM77 Express PCH. The 807UE Celeron® CPU offers a good performance level at an extremely low power consumption plus a superior graphics performance through the Intel® HD graphics core. On top of that the QM77 PCH provides the latest I/O interfaces such as USB3.0 or SATA 6Gb/s. The CPU board offers up to 4GB 1333 MHz DDR3 SDRAM with Error Checking and Correction (ECC). On the system side, the CP3003-V supports a PCI 32-bit/33MHz CompactPCI® interface enabling the passive mode feature. When installed in a system master slot, the CompactPCI® interface is enabled, whereas the CompactPCI® interface will be isolated when installed in a peripheral slot.

Comprehensive I/O Connectivity
The CP3003-V comes as compact all-in-one solution that offers a comprehensive set of interfaces. At the front panel a variety of communication interfaces such as one VGA, two DisplayPort, one USB 3.0, two USB 2.0, three Gigabit Ethernet ports and a Serial port (RS-232) are available. Two SATA 6Gb/s interfaces and a CFast socket, all realized as onboard connectors, complete the board's I/O capabilities.

Long-Term Availability
Investing in a new project is always a challenge and risky. Extending the lifetime of an application to the maximum possible is therefore a critical issue to save the development investments. Delivering a stable product based on Intel®’s embedded product line, the CP3003-V ensures long-term availability. This eliminates the risk of unplanned design changes and unexpected expensive application modification. While minimizing deployment risks by providing a broad range of software support, the CP3003-V eases the process of product integration and maximizes your competitive advantage to meet your time-to-market window.

### MEMORY SYSTEM

- **BOOT FLASH (UEFI) EEPROM**
  - Two redundant 8 MB SPI boot FLASHes with fail-over functionality
  - Serial EEPROM (24LC64) 64 Kbit for storing uEFI BIOS settings and serial number
  - Eight x1 PCI Express® 2.0 ports operating at 5.0 GT/s (only three x1 PCI Express® ports are used)

### ONBOARD CONTROLLER

- **PLATFORM CONTROLLER HUB**
  - Mobile Intel® QM77 Platform Controller Hub featuring:
    - USB host interface with ten USB2.0 and four USB3.0 ports (only two USB2.0 and one USB3.0 ports are used on the CP3003-V)
    - SATA host controller with four SATA 3Gb/s and two SATA 6Gb/s ports with RAID support (only 1x SATA 3Gb/s and two SATA 6Gb/s ports are used on the CP3003-V)
    - Eight x1 PCI Express® 2.0 ports operating at 5.0 GT/s (only three x1 PCI Express® ports are used)

### GRAPHICS

- High performance 3D graphics controller integrated in the processor:
  - Supports analog displays up to a resolution of 2048 x 1536 pixels with 32-bit color @ 75 Hz
  - Supports digital displays up to a resolution of 1920 x 1200 pixels @ 60 Hz
  - Dynamic Video Memory Technology (DVMT)

### GIGABIT ETHERNET

- Three 1000BASE-T interfaces with WOL (Wake-on-LAN) support, Intel® 82574L Ethernet controller

### UART

- FPGA-based, timeout ranging from 125ms to 4096s programmable in 16 steps, IRQ, reset, dual-stage configuration

### RTC

- Integrated in PCH, with 256 Byte CMOS RAM

### FRONT INTERFACES

- **VGA**
  - 1x VGA-CRT 15-pin D-Sub connector
- **USB**
  - 2x USB 2.0 ports, 4-pin standard USB connectors
  - 1x USB 3.0 port, 9-pin type-A connector
- **ETHERNET**
  - 2x RJ-45 with integrated LEDs (ACT, SPEED)
- **DISPLAYPORT**
  - 2x 20-pin DisplayPort connectors, DVI/HDMI capable through passive cable adapter
- **SERIAL PORT**
  - 1x 16C550-compatible serial port, RS232 signalling, RJ-45
- **CONTROL**
  - 4x POST Code or General Purpose, WD, TH

### ONBOARD INTERFACES

- **SERIAL ATA**
  - 1x onboard standard SATA cable connector with locking mechanism (SATA 6Gb/s)
  - 1x SATA connector for connecting a SATA 2.5" HDD/SSD (SATA 6Gb/s)
  - 1x CFast card socket

### COMPACTPCI® BUS INTERFACE

- PICMG 2.0 Rev. 3.0 compatible, 32-bit/33MHz
  - Universal 5V and 3.3V PCI signalling voltage supported, 7 Req/Gnt & clock lines
  - Operating in system slot as system master and in peripheral slot in PCI passive mode

### HOT SWAP

- Support for all signals to allow peripheral boards to be hot swapped.
  - The individual clocks for each slot and access the backplane ENUM# signal comply with the PICMG 2.1 Hot Swap Specification

### SUPERVISORY FUNCTIONS

- Watchdog, software configurable, 125ms to 4096s in 16 steps, generates IRQ or hardware reset or dual-stage configuration

### SOFTWARE SUPPORT

- AMI uEFI setup console redirection to serial port (VT100 mode) with CMOS setup access, EFI Shell support, board configuration via Shell, diskless, keyboardless, videoless operation
- LAN boot support
- Board identification number accessible via EEPROM
- Support for Windows® 7, Windows® Embedded Standard 7, Linux® (Other OSs may also be used with the CP3003-V. Please contact Kontron for further information)

### COMPLIANCE

- CompactPCI® Core Specification PICMG 2.0 Rev. 3.0
- CompactPCI® Hot Swap Specification PICMG 2.1 Rev. 2.0

### GENERAL

- **DIMENSIONS**
  - 100 x 160mm, 3U/8HP
  - 460 g
- **WEIGHT**
  - 233,687 h acc. to MIL-HDBK-217 FN2, Ground Benign, controlled at 30°C
- **MTBF**
