Open Frame Development Chassis

The open chassis is designed for test and development engineers, providing flexibility and ease of use. The chassis is designed for use with 6U RTM boards, and offers easy access to boards from both sides. The rear profiles are moveable up to 2.5mm for using different RTM boards (cPCI, VME etc.).

The mechanical construction is very robust with 6mm/ .236" thick sidewalls. To ensure efficient cooling, 5 high performance fans are placed below the chassis, with front and rear air plenums to maximize air flow.

The Development chassis can be configured for various platforms, including VPX, VME, VME 64, cPCI, VXI, and VXS. Select from a wide range of backplanes from Hartmann Electronic. You can use backplanes up to a width of 50 HP.
