

# ► HMI Panel PC

The increasing demands in terms of ergonomics and communication options and capabilities are taken into account by the new HMI Control and Visual Panel PC systems. The scalable product line of the Panel PCs in Economy or Business class offers a wide range of processor capacities up to Pentium® III 1.4 GHz and display dimensions from 10" up to 19". The 100% industry-capable Panel PCs meet toughest industrial requirements concerning shock, vibration and temperature resistance.

The integrated innovative cooling concept of the Eco Panel realises a passive and fanless cooling for highest processor performance up to Pentium® III 933 MHz. Optional the field busses CANopen, DeviceNet or Profibus are integrated directly on board, so these systems can thus offer extremely low-cost connection both for conventional field busses and for the future Ethernet link to the field level.

Features	Optimation		Business Panel					Eco Panel				
	Model		104	121	150	170	190 available Q3/2004	104	121	150
