Innovative Web Panel with Scalable Performance

- Capacitive multi-touch
- Display sizes: 7", 10.1" and 15.6"
- IP65 aluminium front bezel, optional stainless steel
- Stainless steel housing
- HTML-5 Chromium based or MicroBrowser
WP WEB PANEL
Multi-Touch Panels with HTML-5 web browser

This modern Web Panel series combines high-quality design with brilliant multi-touch technology displays and scalable performance. The Web Panels feature a robust glass touchscreen set within a stylish aluminium or stainless steel frame. Standard versions are considered for panel mount and offer IP65 protection at the front. The Web Panels are delivered with a performance-optimized HTML5 standard browser or with the sleek MicroBrowser by iniNet. The latter offers the shortest reaction times for PLC controls with an integrated CODESYS web server. For a flexible selection of performance levels single and dual core Arm® processors are provided. The systems have been designed as long-term available building blocks (> 10 years) and can also be customized and expanded for individual requirements.
